

Mobile Phone CCTV Access with Intelligent Video Monitoring System (iVMS)

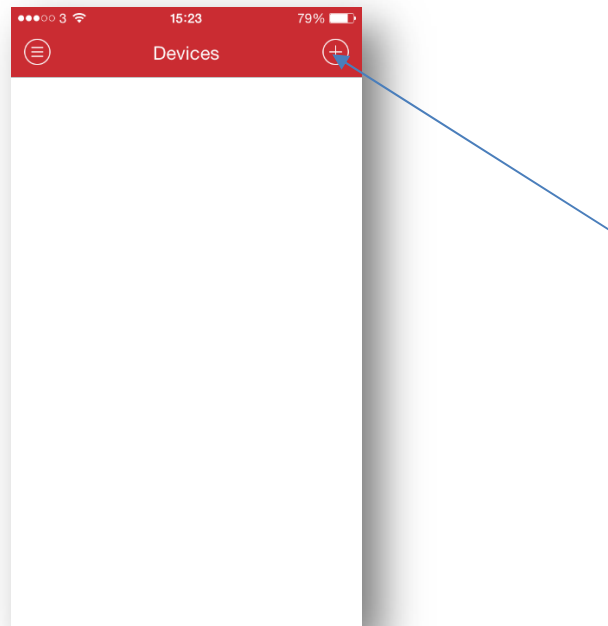

- 1) iVMS is an app that will allow you to access CCTV from your mobile phone.
- 2) Download the app onto your phone from your phone app store: Search for iVMS-4500 Lite
- 3) Once the app has downloaded and installed, launch the application:

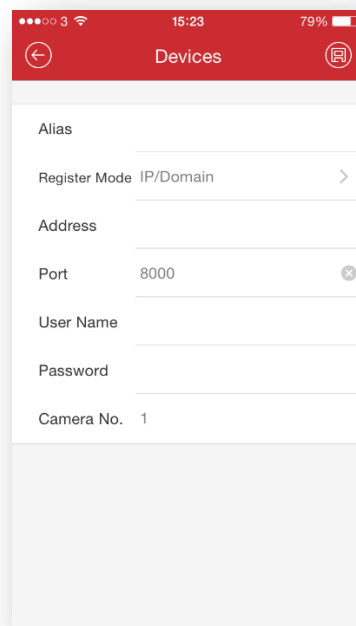

- 4) When the app loads, tap main menu and select 'Devices':

5) On the devices menu, tap 'Add Device':

6) Complete the following fields in the form and then tap 'Save':

A screenshot of the 'Add Device' form in the application. The form is displayed on a white background with a red header bar at the top. The header bar contains a white back arrow icon on the left, the word 'Devices' in the center, and a white document icon on the right. The form fields are as follows:

- Alias: A text input field.
- Register Mode: A dropdown menu currently showing 'IP/Domain' with a right-pointing chevron.
- Address: A text input field.
- Port: A text input field containing the value '8000' and a clear (X) button on the right.
- User Name: A text input field.
- Password: A text input field.
- Camera No.: A text input field containing the value '1'.

7) When the settings are saved, the app will login to you CCTV system and download the number of active cameras. Tap 'Start Live View' and this will display your cameras.
